User Personas

FOR UI 2.0

Persona 1: Ramesh Sharma

- **Demographics**

Name: Ramesh Sharma

Age: 34

Location: Bangalore

Occupation: IT Professional

Income: ₹50,000/month

Family Status: Sole breadwinner

Education: Bachelor's degree

Tech Savviness: High

- **Financial Behavior:**

50% of income goes to household expenses and EMIs.

35% of income is allocated to savings and investments.

Regularly uses digital platforms for financial transactions.

Prefers online applications over in-person financial interactions.

- **Emotional Journey with Personal Loans:**

Stress and Anxiety: Concerned about the repayment burden and impact on savings.

Compromise: Finds it challenging to save for future goals due to ongoing financial responsibilities.

Clarity and Assurance: Seeks transparent processes and clear communication from loan providers.

- **UX & Design Preferences:**

Values seamless and intuitive user experiences.

Prefers minimalistic design with clear call-to-actions.

Requires detailed information presented in a structured manner.

Appreciates features like real-time notifications and auto-reminders.

- **Comprehension:**

Highly literate, comfortable with technical and financial jargon.

Prefers content in English.

Can easily navigate complex interfaces and make informed decisions based on data.

Persona 2: Suresh

- **Demographics**

Name: Suresh

Age: 42

Location: Lucknow

Occupation: Small Business Owner

Income: ₹70,000/month

Family Status: Married with two children

Education: High school

Tech Savviness: Moderate

- **Financial Behavior:**

50% of income goes to household expenses and EMIs.

20% into savings or investments.

Comfortable using digital platforms but prefers Hindi language.

Seeks loans for business expansion and personal needs.

- **Emotional Journey with Personal Loans:**

Stress: Balancing business expenses and family needs.

Compromise: Struggles with high-interest rates and paperwork.

Expectation: Seeks quick, easy access to funds with transparent processes and minimal documentation.

- **UX & Design Preferences:**

Prefers straightforward, easy-to-navigate interfaces.

Likes visual aids and tooltips for better understanding.

Requires bilingual support (Hindi and English) for better comprehension.

Values customer support options and quick access to assistance.

- **Comprehension:**

Moderate literacy, prefers simple language.

Needs clear, concise instructions to navigate digital interfaces.

Relies on visual cues and straightforward information to make decisions.

Persona 3: Sameer

- **Demographics**

Name: Sameer

Age: 38 Location: Salem

Occupation: Security in a Pvt firm

Income: ₹18,000/month

Family Status: Living with 2 kids and elderly parents

Education: High School

Tech Savviness: Moderate

- **Financial Behavior:**

No savings; entire salary is spent within a few weeks on household expenses and EMIs.

Prefers in-person financial interactions and relies on local money lenders.

- **Emotional Journey with Personal Loans:**

Stress and Anxiety: High due to financial responsibilities and limited income.

Trust Issues: Prefers trusted sources due to previous negative experiences with financial institutions.

Expectation: Desires simple, straightforward processes and clear communication.

- **UX & Design Preferences:**

Prefers interfaces with support

Needs a user-friendly design with large icons and easy navigation.

Values face-to-face customer support and clear, step-by-step instructions.

Appreciates visual aids and tutorials to understand product features.

- **Comprehension:**

Limited literacy, prefers content in regional language for better understanding.

Benefits from visual aids and straightforward, jargon-free content.

Requires clear, concise instructions to navigate digital interfaces.

Demographic differences influencing user behaviour

1. Education Levels and user comprehension were not consistently proportional:

- **Formal education didn't consistently correlate with user comprehension**; participants with degrees also struggled with the understanding of certain terms and concepts while some participants with low education levels exhibited good financial savviness
- The major difference around education levels revolves around **literacy & language comprehension, when English fluency was low.**
- Most participants' preferred **language of app usage was English** whereas **they preferred regional languages for conversation**

2. Semi-urban towns (Nashik & Salem:)

- a. Participants were most comfortable with their regional language and faced barriers with Hindi and English; They can read English but have low comprehension and comfort levels.
- b. Salem participants tended to struggle the most with Hindi due to the primary state language being Tamil; Nashik users were more comfortable with Marathi but comprehended Hindi well.
- c. Salem users also often mentioned a history of gold loans
- d. Both Nashik and Salem also mentioned private money lenders as a point of comparison for rate of interest

3. Metro cities (Bangalore & Lucknow):

- a. Bangalore users overall were more tech-savvy and financially savvy, as well as multilingual when compared to other cities. This could be due to a difference in urban versus semi-urban population samples, but more analysis is needed for conclusive insights.
- b. Both Lucknow and Bangalore had participants that were more likely to use online applications for loans compared to Nashik and Salem, where there was still a stronger preference for in-person financial interactions

Archetypes/ Personas

- Key Characteristics

THE PLANNER	THE EASY GOING	THE TRENDSETTER	THE DISCERNING
✓ Forward Looking, Well planned ✓ Calculative Risk Taker, Evaluative & Pragmatic ✓ Willing to experiment, basis sound research ✓ Compares and weighs pros – cons ✓ Life Mantra : 'planning in all phases of life crucial for effective results'	✓ Carefree, Casual, Unplanned ✓ Takes on life as it comes; not too worried about future ✓ Short term thinking – follows easy going approach/ doesn't evaluate much ✓ Life Mantra : 'minimalist living is the best, you don't need to unnecessarily stretch beyond capacity'	✓ Young, Dynamic, Open to Explore ✓ Experimentative - willing to take risks ✓ Independent and confident - limited influence of peers ✓ Early adopter - usually the first ones to try ✓ Life Mantra : 'live life to the max'	✓ Experienced, Conservative, Risk Averse ✓ Prefers stability and a prudent approach towards finances – newer avenues, not always the first choice ✓ Particular about own choices – prefers gaining knowledge first ✓ Life Mantra : 'better to be safe than sorry'
